SECTION 7 - REGULATION FD
Item 7.01 Regulation FD Disclosure.

On October 7, 2021, the Company disseminated a news release which is reproduced below in its entirety.

PETROTEQ PROVIDES UPDATE ON TSXV APPLICATION FOR REINSTATEMENT

Sherman Oaks, California - October 7, 2021 - Petroteq Energy Inc. ("**Petroteq**" or the "**Company**") (TSXV:PQE; OTC:PQEFF; FSE:PQCF), an oil company focused on the development and implementation of its proprietary oil-extraction and remediation technologies, provides the following update regarding its application for reinstatement of its common shares (the "**Common Shares**") on the TSX Venture Exchange (the "**Exchange**").

By way of background, the Ontario Securities Commission (the "**OSC**") issued a cease trade order (the "**CTO**") on August 6, 2021, as a result of Company's failure to file its quarterly report on Form 10-Q (and related certifications) for the period ended May 31, 2021 ("**2021 Q3 Filings**") on or before July 30, 2021, as required under Canadian National Instrument 51-102 - *Continuous Disclosure Obligations*. As previously disclosed, OSC revoked its cease trade order effective August 24, 2021.

The Company filed the 2021 Q3 Filings on SEDAR and with the United States Securities and Exchange Commission (the "**SEC**") on August 19, 2021. In addition, on August 19, 2021, the Company's amended financial statements and management's discussion and analysis for the eight quarters from May 31, 2019 to February 28, 2021 were filed on SEDAR and with the SEC, as contained in the Company's amended annual reports on Form 10-K/A for the financial years ended August 31, 2019 and August 31, 2020, and in the Company's amended quarterly reports on Form 10-Q/A for the periods ended May 31, 2019, November 30, 2019, February 29, 2020, May 31, 2020, November 30, 2020 and February 28, 2021. The Company's amended financial statements and management discussion and analysis for the period ended February 28, 2019, were filed on SEDAR on August 23, 2021, and with the SEC on August 25, 2021, as exhibits to the Company's current report on Form 8-K.

As a result of the issuance of the CTO on August 6, 2021, the Exchange suspended trading of the Company's Common Shares. As part of the Exchange's review of the Company's reinstatement application, the Exchange reviewed the Company's financial statements for the three and nine months ended May 31, 2021, and raised concerns over unapproved filings. As a result of an internal investigation the Company identified transactions reported on SEDAR ("Canada") and EDGAR ("United States") which had not been submitted for approval by Toronto Stock Exchange.

Based on the Company's initial review of the Transactions, it is estimated that a total of 54,370,814 Common Shares were issued as a result of the Transactions. While some of the issued Common Shares, namely, 4,336,972, are estimated to have been issued at prices above what the Exchange would have otherwise approved, 50,033,842 are estimated to have been issued at share prices below what the Exchange generally approves for convertible securities. While the Company is now making the necessary submissions with the Exchange for the Transactions, they may not all be accepted for approval by the Exchange and as a condition of reinstatement to trading on the Exchange the Company may need to take remedial action to bring the Transactions into compliance.

The Transactions, described below, were all disclosed in the Company's financial statements (all dollar amounts are expressed in U.S. currency unless otherwise indicated):

- On May 7, 2020, the Company issued to an arm's length lender a \$64,300 convertible note (including a 10% original issue discount) for a purchase price of \$58,000, bearing interest at 12% per annum, maturing on May 7, 2021, and convertible into Common Shares. On October 1, 2020, the \$192,862 convertible redeemable note was converted into 10,285,991 Common Shares at \$0.01875 per share. There is currently no principal or interest remaining on the note.

About Petroteq Energy Inc.

Petroteq is a clean technology company focused on the development, implementation and licensing of a patented, environmentally safe and sustainable technology for the extraction and reclamation of heavy oil and bitumen from oil sands and mineable oil deposits. The versatile technology can be applied to both water-wet deposits and oil-wet deposits - outputting high-quality oil and clean sand.

Petroteq believes that its technology can produce a relatively sweet heavy crude oil from deposits of oil sands at Asphalt Ridge without requiring the use of water, and therefore without generating wastewater which would otherwise require the use of other treatment or disposal facilities which could be harmful to the environment. Petroteq's process is intended to be a more environmentally friendly extraction technology that leaves clean residual sand that can be sold or returned to the environment, without the use of tailings ponds or further remediation.
